INDEX OF AUTHORS

Aleksandrov, A. G. *Smooth deformations of reduced curves* 537

Badkov, V. M. *Convergence in the mean and almost-everywhere of Fourier series in polynomials orthogonal on an interval* 223

Berezin, F. A. *Spectral properties of generalized Toeplitz matrices* 299

Bočkarev, S. V. *Existence of a basis in the space of functions analytic in the disk, and some properties of Franklin's system* 1

Brusencev, A. G. and Rofe-Beketov, F. S. *Selfadjointness conditions for strongly elliptic systems of arbitrary order* 103

Buzdalin, V. V. *Trigonometric Fourier series of continuous functions diverging on a given set* 79

Donin, I. F. *Construction of versal deformations for projective algebraic varieties* 17

Dzjadyk, V. K. *On convergence conditions for Dirichlet series on closed polygons* 463

Džrbašjan, M. M. *Biorthogonal systems of rational functions and best approximation of the Cauchy kernel on the real axis* 409

Fedosov, B. V. *An analytic formula for the index of an elliptic boundary-value problem.* II 511

Frenkin, B. R. *Reducibility and uniform reducibility of algebraic operations* 373

Fursikov, A. V. See Višik, M. I. and Fursikov, A. V.

Galočkin, A. I. *Estimates from below of polynomials in the values of analytic functions of a certain class* 385

Garkavi, A. L. and Šmatkov, V. A. *On the Lamé point and its generalizations in a normed space* 267

Gorbacevič, V. V. *On a class of decompositions of semisimple Lie groups and algebras* 287

Kričever, I. M. *Remark on the paper "Actions of finite cyclic groups on quasi-complex manifolds"* 145

Krop, L. E. and Plotkin, B. I. *Magnus varieties in group representations* 487

Krylov, P. A. *Radicals of endomorphism rings of torsion-free abelian groups* 209

Kučerenko, V. V. *Asymptotic solutions of equations with complex characteristics* 159

Kučment, P. A. and Pankov, A. A. *Classifying spaces for equivariant K-theory* ... 31

Kukin, G. P. *On free products of restricted Lie algebras* 49

Lender, V. B. *On steps of solubility of lattices and degrees of idempotency of prevarieties of lattices* 435

Ljubič, Ju. I. *Two-level Bersteinian populations* 593

Manin, Ju. I. See Višik, M. M. and Manin, Ju. I.

Marčenko, V. A. *The periodic Korteweg-deVries problem* 319

Oleĭnik, O. A. and Radkevič, E. V. *Analyticity and theorems of Liouville and Phragmén-Lindelöf type for general elliptic systems of differential equations* 127

Pankov, A. A. See Kuĉment, P. A. and Pankov, A. A.

Plotkin, B. I. See Krop, L. E. and Plotkin, B. I.

Radkevič, E. V. See Oleĭnik, O. A. and Radkevič, E. V.

Rofe-Beketov, F. S. See Brusencev, A. G. and Rofe-Beketov, F. S.

Roganov, Ju. V. *Rigidity of minimal algebras* 482

Šaginjan, L. A. *On the limits of indetermination and on the set of limit functions of series in the Walsh system* 257

Sidel'nikov, V. M. *New bounds for densest packing of spheres in n-dimensional Euclidean space* 147

Šmatkov, V. A. See Garkavi, A. L. and Šmatkov, V. A.

Šubin, M. A. *Differential and pseudodifferential operators in spaces of almost periodic functions* 547

Višik, M. I. and Fursikov, A. V. *Asymptotic expansion of moment functions of solutions of nonlinear parabolic equations* 575

Višik, M. M. and Manin, Ju. I. *p-adic Hecke series of imaginary quadratic fields* 345

Zarhin, Ju. G. *Isogenies of abelian varieties over fields of finite characteristic* 451
